

MARC MATHIEU

Senior Front-End Engineer | Miami, Florida

avianmathieu@gmail.com | 305-904-2843

SUMMARY

Senior Front-End Engineer with 10+ years of experience building scalable web applications and customer-facing products. Specializes in React, Next.js, JavaScript, and TypeScript, with a strong background in e-commerce, subscription platforms, and API-driven applications. Experienced in leading complex initiatives and collaborating across product, design, backend, and QA teams.

CORE SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, Redux, React Query, HTML5, CSS3/Sass

Backend & APIs: Node.js, REST APIs, GraphQL, Shopify APIs, NoSQL

Platforms: Shopify, Stripe, Sanity, Strapi, Flutter, Jotai

Testing & Delivery: Playwright, Automated Testing, Git, GitLab CI/CD, Agile/Scrum

Experimentation & Analytics: Statsig, LaunchDarkly, RudderStack, Feature Flags, A/B Testing

PROFESSIONAL EXPERIENCE

Senior Software Engineer | 2018 - Aug 2026

Code Particle (digital consultancy) | Key clients: AG1, BeautyNexos | Other clients: Tenable, Open Raven, EA Sports, Verto, Rebus | Miami, FL

- Played a leading role in the migration of AG1's subscription platform serving ~1M users to Shopify's Subscriptions APIs, rebuilding core React/Next.js experiences with zero customer-facing downtime.
- Selected to lead frontend delivery for AG1, owning execution across active initiatives and meeting twice weekly with the Engineering Lead, Backend Lead, and Head of Product to communicate progress, surface delivery risks, and proactively flag potential schedule issues.
- Increased release velocity from approximately 2 releases per week to daily by improving Sanity CMS schemas, content models, and configuration, enabling product and design teams to ship experience updates independently of engineering.
- Expanded AG1's commerce platform across six international markets, delivering market-specific subscription flows and integrating Monta pickup-point shipping into Stripe Checkout so customers could select designated pickup locations during purchase.
- Implemented experimentation, feature-flag, and analytics infrastructure using Statsig, LaunchDarkly, and RudderStack, enabling controlled rollouts, A/B testing, and data-informed product decisions.
- Owned key BeautyNexos initiatives across Flutter and Strapi/TypeScript, delivering Trade Calendar, user profile management, Stripe payments, and subscription add-on experiences while contributing to automated testing and platform reliability.
- Delivered front-end interfaces and product tooling across enterprise clients including Tenable, Open Raven, EA Sports, Verto, and Rebus, collaborating across product, design, QA, and backend teams and contributing to API-driven workflows spanning cybersecurity, gaming, and blockchain products.

Lead Software Engineer | 2015 - 2018

SonicLoop Networks | Miami, FL

- Translated product and design concepts into responsive public websites and internal tools for corporate clients, partnering directly with designers and stakeholders.
- Built and maintained Node.js services and NoSQL-backed applications supporting client-facing and internal products.
- Led a team of 4 junior developers and facilitated Agile/Scrum ceremonies to coordinate delivery.

Software Engineer | 2014 - 2015

Spatially | Coral Gables, FL

- Built UI/UX features for the aboutPLACE web application, translating product requirements into responsive front-end experiences.
- Built company web experiences including Urban4m and served as Scrum Master to improve team delivery.

EDUCATION & TRAINING

Florida International University - B.B.A., Management Information Systems, 2014

Ironhack - Full-Stack Web Development, 2015
