

MARC MATHIEU

Senior Front-End Engineer | Miami, Florida

avianmathieu@gmail.com | 305-904-2843

SUMMARY

Senior Front-End Engineer with 10+ years of experience building scalable web applications and customer-facing products. Specializes in React, Next.js, JavaScript, and TypeScript, with a strong background in e-commerce, subscription platforms, and API-driven applications. Experienced leading complex initiatives and collaborating across product, design, backend, and QA teams.

CORE SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, Redux, React Query, HTML5, CSS3/Sass

Backend & APIs: Node.js, REST APIs, GraphQL, Shopify APIs, NoSQL

Platforms: Shopify, Stripe, Sanity, Strapi, Flutter, Jotai

Testing & Delivery: Playwright, Automated Testing, Git, GitLab CI/CD, Agile/Scrum

Experimentation & Analytics: Statsig, LaunchDarkly, RudderStack, Feature Flags, A/B Testing

PROFESSIONAL EXPERIENCE

Senior Software Engineer | 2018 - Aug 2026

Code Particle (digital consultancy) | Key clients: AG1, BeautyNexos | Other clients: Tenable, Open Raven, EA Sports, Verto, Rebus | Miami, FL

- Played a leading role in the migration of AG1's subscription platform serving ~1M users to Shopify's Subscriptions APIs, rebuilding core React/Next.js experiences with zero customer-facing downtime.
- Increased release velocity from approximately 2 releases per week to daily by improving Sanity CMS schemas, content models, and configuration, enabling product and design teams to ship experience updates independently of engineering.
- Expanded AG1's commerce platform across six international markets, delivering market-specific subscription flows, EU pickup-point shipping through Monta, and product-change capabilities for a growing global customer base.
- Implemented experimentation, feature-flag, and analytics infrastructure using Statsig, LaunchDarkly, and RudderStack, enabling controlled rollouts, A/B testing, and data-informed product decisions.
- Owned key BeautyNexos initiatives across Flutter and Strapi/TypeScript, delivering Trade Calendar, user profile management, Stripe payments, and subscription add-on experiences while contributing to automated testing and platform reliability.
- Delivered high-volume front-end interfaces for enterprise clients including Tenable, Open Raven, and EA Sports, partnering directly with product, design, QA, backend engineering, and client stakeholders.
- Built UI tools, APIs, and deterministic wallet functionality for Verto and Rebus, supporting crypto exchange, purchasing, staking, and blockchain transactions across Bitcoin, Ethereum, and ZEN.
- Led front-end delivery across multiple client engagements through sprint planning, technical decisions, code reviews, and cross-functional collaboration.

Lead Software Engineer | 2015 - 2018

SonicLoop Networks | Miami, FL

- Translated product and design concepts into responsive public websites and internal tools for corporate clients, partnering directly with designers and stakeholders.
- Built and maintained Node.js services and NoSQL-backed applications supporting client-facing and internal products.
- Led a team of 4 junior developers and facilitated Agile/Scrum ceremonies to coordinate delivery.

Software Engineer | 2014 - 2015

Spatially | Coral Gables, FL

- Built UI/UX features for the aboutPLACE web application, translating product requirements into responsive front-end experiences.
- Built company web experiences including Urban4m and served as Scrum Master to improve team delivery.

EDUCATION & TRAINING

Florida International University - B.B.A., Management Information Systems, 2014

Ironhack - Full-Stack Web Development, 2015
