

MARC MATHIEU

Senior Front-End Engineer | Miami, Florida

avianmathieu@gmail.com | 305-904-2843

SUMMARY

Senior Front-End Engineer with 10+ years of experience building scalable web applications and customer-facing products. Specializes in React, Next.js, JavaScript, and TypeScript, with deep experience in design systems, accessibility, API-driven applications, and AI-assisted software development. Experienced in leading complex initiatives and collaborating across product, design, backend, and QA teams.

CORE SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, Redux, React Query, RxJS, HTML5, CSS3/Sass, Storybook

Design Systems & Accessibility: Design Systems, Component Libraries, Accessibility, WCAG, Responsive Design

Backend & APIs: Node.js, REST APIs, GraphQL, Shopify APIs, NoSQL

Platforms: Shopify, Stripe, Sanity, Strapi, Flutter, Jotai

AI & Developer Productivity: Cursor, Codex, Claude Code, MCP integrations, agentic development workflows, reusable AI skills, prompt engineering

Testing & Delivery: Playwright, Automated Testing, Git, GitLab CI/CD, Agile/Scrum

Experimentation & Analytics: Statsig, LaunchDarkly, RudderStack, Feature Flags, A/B Testing

PROFESSIONAL EXPERIENCE

Senior Software Engineer | 2018 - Aug 2026

Code Particle (digital consultancy) | Key clients: AG1, BeautyNexos | Other clients: Tenable, Open Raven, EA Sports, Verto, Rebus | Miami, FL

- Played a leading role in the migration of AG1's subscription platform serving ~1M users to Shopify's Subscriptions APIs, rebuilding core React/Next.js experiences with zero customer-facing downtime.
- Selected to lead frontend delivery for AG1, owning execution across active initiatives and meeting twice weekly with the Engineering Lead, Backend Lead, and Head of Product to communicate progress, surface delivery risks, and proactively flag potential schedule issues.
- Increased AG1's release velocity from approximately 2 releases per week to daily by improving Sanity CMS schemas, content models, and configuration, enabling product and design teams to ship experience updates independently of engineering.
- Built and maintained reusable frontend components and Storybook-driven design-system patterns, applying accessibility standards to improve UI consistency, usability, documentation, and collaboration between engineering and design.
- Integrated Cursor, Codex, Claude Code, MCP integrations, and reusable agent workflows into day-to-day engineering for architecture exploration, implementation, debugging, refactoring, test generation, and code review, accelerating delivery while maintaining engineering quality.
- Owned key BeautyNexos initiatives across Flutter and Strapi/TypeScript, delivering Trade Calendar, user profile management, Stripe payments, and subscription add-on experiences while contributing to automated testing and platform reliability.

Lead Software Engineer | 2015 - 2018

SonicLoop Networks | Miami, FL

- Translated product and design concepts into responsive public websites and internal tools for corporate clients, partnering directly with designers and stakeholders.
- Built and maintained Node.js services and NoSQL-backed applications supporting client-facing and internal products.
- Led a team of 4 junior developers and facilitated Agile/Scrum ceremonies to coordinate delivery.

Software Engineer | 2014 - 2015

Spatially | Coral Gables, FL

- Built UI/UX features for the aboutPLACE web application, translating product requirements into responsive front-end experiences.
- Built company web experiences including Urban4m and served as Scrum Master to improve team delivery.

EDUCATION & TRAINING

Florida International University - B.B.A., Management Information Systems, 2014

Ironhack - Full-Stack Web Development, 2015
